Key Learning: to identify number bonds within 10

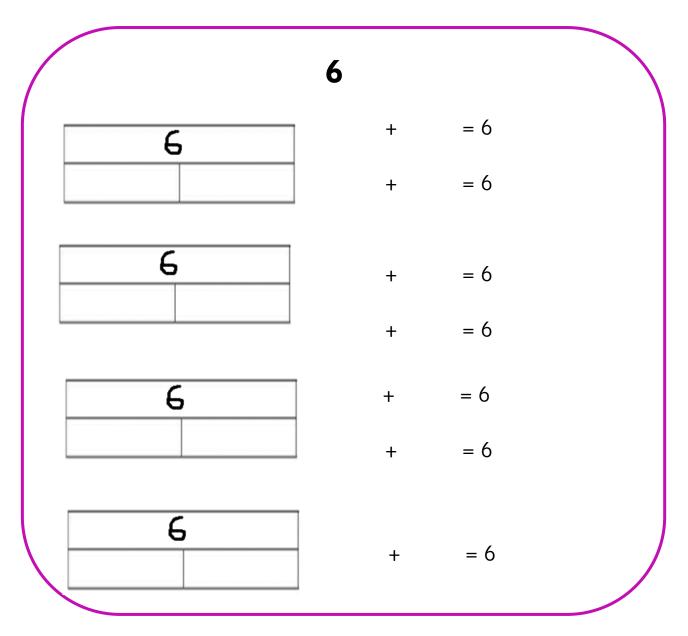

Success Criteria:

I know what a number bond is

I know what 'commutative' mean

I can find number bonds to numbers within 10

Deepening: I can work systematically and use commutativity to find all the possible number bonds

Deepening

What subtraction equations can you identify from these number bonds?

1. 4 + 2 = 6	2.6+1=7	3.3+6=9
2 + 4 = 6	1 + 6 = 7	6 + 3 = 9

Write the subtraction equations into your book:
