Key learning: To add 2 digit numbers crossing tens and apply this in problem solving.   22.3.22
Success criteria:
I can write the equation and correctly draw the tens and ones.
I can group 10 ones together to make 1 ten.
I can count the tens and ones accurately to find the total
Deepening – Word problems, true or false, prove it   Support – I/FS/PS/concrete objects

Draw the tens and one under each part, exchange tens ones for a ten rod and find the total:

Practise and consider

15 + 5 =

17 + 14 =

9 + 13 =

8 + 16 =

Use your addition knowledge to add together the animals at The Deep

Independent task

1. Pick two animals from the pack
2. Write the equation in your book
3. Solve the equation
